# Task sceme – Development of Declaration of Productinformation

A1	MSs compile product requirements required by the construction authorities, depending on the intended use.
A2	MSs specify performance requirements for the essential characteristics, depending on the intended use.
A3	EU Commission compiles a consolidated list of all essential characteristics required for harmonized construction product standards by the MSs, for all intended uses.
A4	EU Commission checks whether Annex ZA in product standards covers all essential characteristics on the consolidated list.
A5	EU Commission establishes the conditions enabling the essential characteristics included in the consolidated list to be referenced by the MSs.
A6	EU Commission requests CEN to split each harmonized product standard into two sections. Section A comprises all content relating to Annex ZA. Section B covers product characteristics required for market reasons but not relevant for the construction authorities.
A7	Digital product information is made available by Product Contact Points and manufacturers.
